# Front End Web Engineer

Not a code monkey.

I'm not a full fledged code monkey. . .
but I do enjoy pizza, sitting down and solving
programming problems, designing, and long
walks on the beach (though I prefer running).

Why hire me when you could be hiring offshore right?
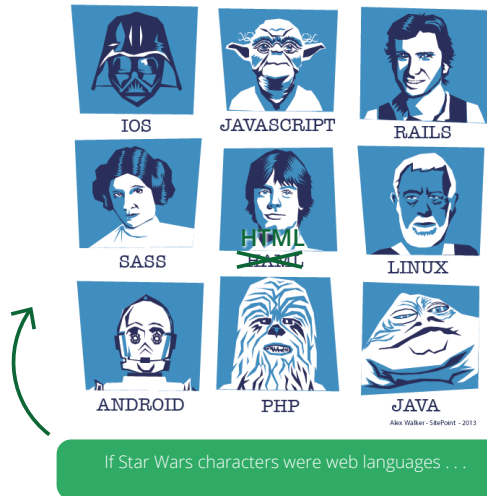

CODE MONKEY

I'm a UX guy, not a UI guy.

I design for the user's experience. This takes into account usability, accessibility, speed, relevance of information, and the interactions that the user should be having with the site.

If you're looking for something to be beautiful, I'm not the droid you're looking for. Conversely, if you're looking for someone to make the experience fun, let's grab some food off the Mickey D's dollar menu and we'll draft up some gorgeous looking story boards.

Me, but without the glasses. Glasses just aren't as hip as they used to be.

What's my code look like?

My code is semantically correct, valid against web standards, easy to read, and cross-browser compatible. If you want some examples, go check out my code samples.

If Star Wars characters were web languages . . .

What languages do I know?

Fluent:
> HTML
> CSS   >> SASS

> JavaScript   >> jQuery
> >> jQuery UI

Familiar:
> PHP
> MySQL
> SQL
> AJAX

An ideal candidate.

I am finishing my senior year at Brigham Young University - Idaho in Web Design and Development.

I have the inexperience of someone who has programmed for 2 years, the drive of a 30-year old, the wisdom of a 40-year old, and am stuck with the payscale of a 20-year old.

I am seeking an internship starting in August 2015. If you like my work, feel free to contact me.

This is the hiring **manager.**   This is **me.**
